# CONTENTS OF VOLUME 22

## NUMBER 1

| | | |
|---|---|---|
| S. A. KATTENHORN, A. AYDIN and D. D. POLLARD | 1 | Joints at high angles to normal fault strike: an explanation using 3-D numerical models of fault-perturbed stress fields |
| K. MAIR, I. MAIN and S. ELPHICK | 25 | Sequential growth of deformation bands in the laboratory |
| T. BAI and D. D. POLLARD | 43 | Fracture spacing in layered rocks: a new explanation based on the stress transition |
| J. V. SMITH | 59 | Three-dimensional morphology and connectivity of stylolites hyperactivated during veining |
| N. SHIGEMATSU and H. TANAKA | 65 | Dislocation creep of fine-grained recrystallized plagioclase under low-temperature conditions |
| P. W. TRIMBY, M. R. DRURY and C. J. SPIERS | 81 | Misorientations across etched boundaries in deformed rocksalt: a study using electron backscatter diffraction |
| F. HEIDELBACH, K. KUNZE and H.-R. WENK | 91 | Texture analysis of a recrystallized quartzite using electron diffraction in the scanning electron microscope |
| S. H. TREAGUS and L. LAN | 105 | Pure shear deformation of square objects, and applications to geological strain analysis |
| J. V. SMITH | 123 | Structures on interfaces of mingled magmas, Stewart Island, New Zealand |
| G. E. McGILL, R. A. SCHULTZ and J. M. MOORE | 135 | Fault growth by segment linkage: an explanation for scatter in maximum displacement and trace length data from the Canyonlands grabens of SE Utah: Discussion |
| J. CARTWRIGHT, B. TRUDGILL and C. MANSFIELD | 141 | Fault growth by segment linkage: an explanation for scatter in maximum displacement and trace length data from the Canyonlands grabens of SE Utah: Reply |
| R. NICHOLSON | 145 | Inter-array and intra-array kinematics of en échelon sigmoidal veins in cross-bedded sandstone, Merimbula, southeastern Australia: Discussion |
| J. V. SMITH | 147 | Inter-array and intra-array kinematics of en échelon sigmoidal veins in cross-bedded sandstone, Merimbula, southeastern Australia: Reply |
| J. KRAUS | 149 | Back-rotation during crenulation cleavage development: implications for structural facing and cleavage-forming processes: Discussion |
| S. E. JOHNSON | 153 | Back-rotation during crenulation cleavage development: implications for structural facing and cleavage-forming processes: Reply |
| | 157 | Referees for Volume 21 |

## NUMBER 2

| | | |
|---|---|---|
| | iii | Editorial |
| J. CONTRERAS, M. H. ANDERS and C. H. SCHOLZ | 159 | Growth of a normal fault system: observations from the Lake Malawi basin of the east African rift |
| G. H. DAVIS, A. P. BUMP, P. E. GARCÍA and S. G. AHLGREN | 169 | Conjugate Riedel deformation band shear zones |
| C. J. GRANT and A. L. HARRIS | 191 | The kinematic and metamorphic history of the Sgurr Beag Thrust, Ross-shire, NW Scotland |
| B. A. COUZENS-SCHULTZ and D. V. WILTSCHKO | 207 | The control of the smectite–illite transition on passive-roof duplex formation: Canadian Rockies Foothills, Alberta |
| B. R. ILG and K. E. KARLSTROM | 231 | Porphyroblast inclusion trail geometries in the Grand Canyon: evidence for non-rotation and rotation? |
| G. JACOB, H. J. KISCH and B. A. VAN DER PLUIJM | 245 | The relationship of phyllosilicate orientation, X-ray diffraction intensity ratios, and c/b fissility ratios in metasedimentary rocks of the Helvetic zone of the Swiss Alps and the Caledonides of Jämtland, central western Sweden |
| O. NISHIKAWA and T. TAKESHITA | 259 | Progressive lattice misorientation and microstructural development in quartz veins deformed under subgreenschist conditions |
| | 277 | Book Review |
| | I | International Newsletter 19, January–February 2000 |

## NUMBER 3

| | | |
|---|---|---|
| | iii | Special Issue: Announcement |
| P. BAUER, C. ROSENBERG and M. R. HANDY | 281 | 'See-through' deformation experiments on brittle–viscous norcamphor at controlled temperature, strain rate and applied confining pressure |
| D. C. P. PEACOCK, R. J. KNIPE and D. J. SANDERSON | 291 | Glossary of normal faults |
| G. POULIMENOS | 307 | Scaling properties of normal fault populations in the western Corinth Graben, Greece: implications for fault growth in large strain settings |
| B. HENRY, H. ROUVIER, M. LE GOFF, A. SMATI, N. HATIRA, E. LAATAR, A. MANSOURI and V. PERTHUISOT | 323 | Paleomagnetism as a structural polarity criterion: application to Tunisian diapirs |
| G. D. H. SIMPSON | 335 | Synmetamorphic vein spacing distributions: characterisation and origin of a distribution of veins from NW Sardinia, Italy |
| A. TEIXELL, D. W. DURNEY and M.-L. ARBOLEYA | 349 | Stress and fluid control on décollement within competent limestone |

N. MANDAL, C. CHAKRABORTY and S. K. SAMANTA — 373 — Boudinage in multilayered rocks under layer-normal compression: a theoretical analysis

J. STARKEY — 383 — Bi-axial quartz as a stress indicator

## NUMBER 4

M. HERWEGH — 391 — A new technique to automatically quantify microstructures of fine grained carbonate mylonites: two-step etching combined with SEM imaging and image analysis

J. HADIZADEH and F. F. FOIT — 401 — Feasibility of estimating cementation rates in a brittle fault zone using Sr/Ca partition coefficients for sedimentary diagenesis

C. A. J. WIBBERLEY, J.-P. PETIT and T. RIVES — 411 — Micromechanics of shear rupture and the control of normal stress

A. YAMAJI — 429 — The multiple inverse method applied to meso-scale faults in mid-Quaternary fore-arc sediments near the triple trench junction off central Japan

A. YAMAJI — 441 — The multiple inverse method: a new technique to separate stresses from heterogeneous fault-slip data

F. LAGROIX and G. J. BORRADAILE — 453 — Tectonics of the circum-Troodos sedimentary cover of Cyprus, from rock magnetic and structural observations

T. KENKMANN — 471 — Processes controlling the shrinkage of porphyroclasts in gabbroic shear zones

J. F. SIMANCAS, J. GALINDO-ZALDÍVAR and A. AZOR — 489 — Three-dimensional shape and emplacement of the Cardenchosa deformed pluton (Variscan Orogen, southwestern Iberian Massif)

T. WANG, X. WANG and W. LI — 505 — Evaluation of multiple emplacement mechanisms: the Huichizi granite pluton, Qinling orogenic belt, central China

W. H. OWENS — 519 — Measuring host rock volume changes during magma emplacement: Discussion

A. S. YOSHINOBU and G. H. GIRTY — 521 — Measuring host rock volume changes during magma emplacement: Reply

D. H. TAYLOR and R. A. CAYLEY — 523 — Character and kinematics of faults within the turbidite-dominated Lachlan Orogen: implications for tectonic evolution of eastern Australia: Discussion

D. R. GRAY and D. A. FOSTER — 529 — Character and kinematics of faults within the turbidite-dominated Lachlan Orogen: implications for tectonic evolution of eastern Australia: Reply

## NUMBER 5

T. HIRONO — 537 — Determination of slip sense along a fault in an unlithified sediment

M. STEWART, R. E. HOLDSWORTH and R. A. STRACHAN — 543 — Deformation processes and weakening mechanisms within the frictional–viscous transition zone of major crustal-scale faults: insights from the Great Glen Fault Zone, Scotland

Z. H. WANG and H. F. LU — 561 — Ductile deformation and $^{40}Ar/^{39}Ar$ dating of the Changle–Nanao ductile shear zone, southeastern China

O. ORTEGA and R. MARRETT — 571 — Prediction of macrofracture properties using microfracture information, Mesaverde Group sandstones, San Juan basin, New Mexico

I. KENIS, Ph. MUCHEZ, M. SINTUBIN, J. L. MANSY and F. LACQUEMENT — 589 — The use of a combined structural, stable isotope and fluid inclusion study to constrain the kinematic history at the northern Variscan front zone (Bettrechies, northern France)

D. H. JOHNSTON, P. F. WILLIAMS, R. L. BROWN, J. L. CROWLEY and S. D. CARR — 603 — Northeastward extrusion and extensional exhumation of crystalline rocks of the Monashee complex, southeastern Canadian Cordillera

M. ROCHER, O. LACOMBE, J. ANGELIER, B. DEFFONTAINES and F. VERDIER — 627 — Cenozoic folding and faulting in the south Aquitaine Basin (France): insights from combined structural and paleostress analyses

O. BOLLE, H. DIOT and J.-C. DUCHESNE — 647 — Magnetic fabric and deformation in charnockitic igneous rocks of the Bjerkreim–Sokndal layered intrusion (Rogaland, Southwest Norway)

G. W. HUNT, M. A. PELETIER and M. A. WADEE — 669 — The Maxwell stability criterion in pseudo-energy models of kink banding

G. PENNACCHIONI, L. FASOLO, M. M. CECCHI and L. SALASNICH — 683 — Finite-element modelling of simple shear flow in Newtonian and non-Newtonian fluids around a circular rigid particle

## NUMBER 6

S. A. STEWART and J. D. ARGENT — 693 — Relationship between polarity of extensional fault arrays and presence of detachments

D. C. SRIVASTAVA — 713 — Geometrical classification of conjugate vein arrays

C. DEZAYES, T. VILLEMIN and A. PÈCHER — 723 — Microfracture pattern compared to core-scale fractures in the borehole of Soultz-sous-Forêts granite, Rhine graben, France

A. B. WEIL, R. VAN DER VOO, B. A. VAN DER PLUIJM and J. M. PARÉS — 735 — The formation of an orocline by multiphase deformation: a paleomagnetic investigation of the Cantabria–Asturias Arc (northern Spain)

D. SHELLEY and G. BOSSIÈRE — 757 — A new model for the Hercynian Orogen of Gondwanan France and Iberia

S. JOY and D. SAHA — 777 — Dynamically recrystallised quartz *c*-axis fabrics in greenschist facies quartzites, Singhbhum shear zone and its footwall, eastern India—influence of high fluid activity

R. KLEINSCHRODT and A. McGREW — 795 — Garnet plasticity in the lower continental crust: implications for deformation mechanisms based on microstructures and SEM-electron channeling pattern analysis

A. F. M. KISTERS, J. KOLB, F. M. MEYER and S. HOERNES — 811 — Hydrologic segmentation of high-temperature shear zones: structural, geochemical and isotopic evidence from auriferous mylonites of the Renco mine, Zimbabwe

N. MANDAL, C. CHAKRABORTY and S. K. SAMANTA — 831 — An analysis of anisotropy of rocks containing shape fabrics of rigid inclusions

841 — Book Review

## NUMBER 7

iii — Special Issue Announcement: Deadline extended

D. C. P. PEACOCK, S. P. PRICE, A. G. WHITHAM and C. S. PICKLES — 843 — The World's biggest relay ramp: Hold With Hope, NE Greenland

H. FOSSEN and J. HESTHAMMER — 851 — Possible absence of small faults in the Gullfaks Field, northern North Sea: implications for downscaling of faults in some porous sandstones

A. GUPTA and C. H. SCHOLZ — 865 — A model of normal fault interaction based on observations and theory

D. GAPAIS, P. R. COBBOLD, O. BOURGEOIS, D. ROUBY and M. DE URREIZTIETA — 881 — Tectonic significance of fault-slip data

A. YASSAGHI, P. R. JAMES and T. FLOTTMANN — 889 — Geometric and kinematic evolution of asymmetric ductile shear zones in thrust sheets, southern Adelaide Fold–Thrust Belt, South Australia

S. E. SCHULZ and J. P. EVANS — 913 — Mesoscopic structure of the Punchbowl Fault, Southern California and the geologic and geophysical structure of active strike-slip faults

W. GHEBREAB and C. J. TALBOT — 931 — Red Sea extension influenced by Pan-African tectonic grain in eastern Eritrea

S. HANMER — 947 — Matrix mosaics, brittle deformation, and elongate porphyroclasts: granulite facies microstructures in the Striding–Athabasca mylonite zone, western Canada

R. HEILBRONNER — 969 — Automatic grain boundary detection and grain size analysis using polarization micrographs or orientation images

J. P. CRADDOCK, K. J. NIELSON and D. H. MALONE — 983 — Calcite twinning strain constraints on the emplacement rate and kinematic pattern of the upper plate of the Heart Mountain Detachment

N. MANDAL, S. K. SAMANTA and C. CHAKRABORTY — 993 — Progressive development of mantle structures around elongate porphyroclasts: insights from numerical models

I — International Newsletter 20, June–July 2000

## NUMBER 8

| | | |
|---|---|---|
| A. T. ZEHNDER and R. W. ALLMENDINGER | 1009 | Velocity field for the trishear model |
| O. FABBRI, A. LIN and H. TOKUSHIGE | 1015 | Coeval formation of cataclasite and pseudotachylyte in a Miocene forearc granodiorite, southern Kyushu, Japan |
| N. C. MOREWOOD and G. P. ROBERTS | 1027 | The geometry, kinematics and rates of deformation within an en échelon normal fault segment boundary, central Italy |
| A. SAINTOT and J. ANGELIER | 1049 | Plio-Quaternary paleostress regimes and relation to structural development in the Kertch–Taman peninsulas (Ukraine and Russia) |
| K. A. FOXFORD, R. NICHOLSON, D. A. POLYA and R. P. B. HEBBLETHWAITE | 1065 | Extensional failure and hydraulic valving at Minas da Panasqueira, Portugal: evidence from vein spatial distributions, displacements and geometries |
| P. VANNUCCHI and H. TOBIN | 1087 | Deformation structures and implications for fluid flow at the Costa Rica convergent margin, ODP Sites 1040 and 1043, Leg 170 |
| R. E. HOLDSWORTH and R. V. L. PINHEIRO | 1105 | The anatomy of shallow-crustal transpressional structures: insights from the Archaean Carajás fault zone, Amazon, Brazil |
| M. MOHAJJEL and C. L. FERGUSSON | 1125 | Dextral transpression in Late Cretaceous continental collision, Sanandaj–Sirjan Zone, western Iran |
| D. KOEHN and C. W. PASSCHIER | 1141 | Shear sense indicators in striped bedding-veins |
| I. M. PLATTEN | 1153 | Incremental dilation of magma filled fractures: evidence from dykes on the Isle of Skye, Scotland |
| M. BONINI, D. SOKOUTIS, G. MULUGETA and E. KATRIVANOS | 1165 | Modelling hanging wall accommodation above rigid thrust ramps |
| S. BODORKOS, P. A. CAWOOD and N. H. S. OLIVER | 1181 | Timing and duration of syn-magmatic deformation in the Mabel Downs Tonalite, northern Australia |
| E. C. FERRÉ and L. AMÉGLIO | 1199 | Preserved magnetic fabrics vs. annealed microstructures in the syntectonic recrystallised George granite, South Africa |

## NUMBER 9

| | | |
|---|---|---|
| A. GUDMUNDSSON | 1221 | Fracture dimensions, displacements and fluid transport |
| V. ACOCELLA, A. GUDMUNDSSON and R. FUNICIELLO | 1233 | Interaction and linkage of extension fractures and normal faults: examples from the rift zone of Iceland |
| Y.-J. LEE and D. V. WILTSCHKO | 1247 | Fault controlled sequential vein dilation: competition between slip and precipitation rates in the Austin Chalk, Texas |
| M. MUKUL | 1261 | The geometry and kinematics of the Main Boundary Thrust and related neotectonics in the Darjiling Himalayan fold-and-thrust belt, West Bengal, India |

D. HINDLE, O. BESSON and M. BURKHARD — 1285 — A model of displacement and strain for arc-shaped mountain belts applied to the Jura arc

G. W. BERGANTZ — 1297 — On the dynamics of magma mixing by reintrusion: implications for pluton assembly processes

D. KOEHN, C. HILGERS, P. D. BONS and C. W. PASSCHIER — 1311 — Numerical simulation of fibre growth in antitaxial strain fringes

H. TAKAGI, K. GOTO and N. SHIGEMATSU — 1325 — Ultramylonite bands derived from cataclasite and pseudotachylyte in granites, northeast Japan

M. S. PATERSON and D. L. OLGAARD — 1341 — Rock deformation tests to large shear strains in torsion

D. D. POLLARD — 1359 — Strain and stress: Discussion

D. C. P. PEACOCK and R. MARRETT — 1369 — Strain and stress: Reply

## NUMBER 10

W. H. OWENS — 1379 — An alternative approach to the Busk construction for a single surface

S. ZHANG and S. F. COX — 1385 — Enhancement of fluid permeability during shear deformation of a synthetic mud

F. RENARD, J.-P. GRATIER and B. JAMTVEIT — 1395 — Kinetics of crack-sealing, intergranular pressure solution, and compaction around active faults

T. BAI and D. D. POLLARD — 1409 — Closely spaced fractures in layered rocks: initiation mechanism and propagation kinematics

D. BAHAT and A. RABINOVITCH — 1427 — New fractographic aspects of natural and artificial fractures in chalks from the Upper Galilee, Israel, and experimental fracture in Perspex

Z. VENERA, K. SCHULMANN and A. KRÖNER — 1437 — Intrusion within a transtensional tectonic domain: the Čistá granodiorite (Bohemian Massif)—structure and rheological modelling

K. M. JOHNSON and A. M. JOHNSON — 1455 — Localization of layer-parallel faults in San Rafael swell, Utah and other monoclinal folds

D. ROBERTS — 1469 — Pull-apart stepover structures in an asphalted road surface—a geological curiosity

G. J. POTTS and S. M. REDDY — 1473 — Application of younging tables to the construction of relative deformation histories—1: Fracture systems

A. E. CLIFTON, R. W. SCHLISCHE, M. O. WITHJACK and R. V. ACKERMANN — 1491 — Influence of rift obliquity on fault-population systematics: results of experimental clay models

Y. ZHANG, N. S. MANCKTELOW, B. E. HOBBS, A. ORD and H. B. MÜHLHAUS — 1511 — Numerical modelling of single-layer folding: clarification of an issue regarding the possible effect of computer codes and the influence of initial irregularities

1523 — Book Review

## NUMBERS 11–12

*Editorial*

B. LEISS, K. ULLEMEYER and K. WEBER — 1527 — Introduction to the Special Issue: Textures and Physical Properties of Rocks

*Preface*

B. LEISS, K. ULLEMEYER, K. WEBER, H. G. BROKMEIER, H.-J. BUNGE, M. DRURY, U. FAUL, F. FUETEN, A. FRISCHBUTTER, H. KLEIN, W. KUHS, P. LAUNEAU, G. E. LLOYD, D. J. PRIOR, Ch. SCHEFFZÜK, T. WEISS, K. WALTHER and H.-R. WENK — 1531 — Recent developments and goals in texture research of geological materials

*Section 1: Measuring and Data Processing Methods*

K. ULLEMEYER, G. BRAUN, M. DAHMS, J. H. KRUHL, N. Ø. OLESEN and S. SIEGESMUND — 1541 — Texture analysis of a muscovite-bearing quartzite: a comparison of some currently used techniques

E. JANSEN, W. SCHÄFER and A. KIRFEL — 1559 — The Jülich neutron diffractometer and data processing in rock texture investigations

H. SCHAEBEN — 1565 — Texture analysis of heterogeneous data—a farewell to *F*-coefficients

M. BARTOZZI, A. P. BOYLE and D. J. PRIOR — 1569 — Automated grain boundary detection and classification in orientation contrast images

L. PINTSCHOVIUS, M. PREM and A. FRISCHBUTTER — 1581 — High-precision neutron-diffraction measurements for the determination of low-level residual stresses in a sandstone

A. FRISCHBUTTER, D. NEOV, Ch. SCHEFFZÜK, M. VRÁNA and K. WALTHER — 1587 — Lattice strain measurements on sandstones under load using neutron diffraction

T. WIEDER — 1601 — On the strain-free lattice constants in residual stress evaluation by diffraction

*Section 2: Texture Forming Mechanisms*

P. W. TRIMBY, M. R. DRURY and C. J. SPIERS — 1609 — Recognising the crystallographic signature of recrystallisation processes in deformed rocks: a study of experimentally deformed rocksalt

W. SKROTZKI, R. TAMM, C.-G. OERTEL, J. RÖSEBERG and H.-G. BROKMEIER — 1621 — Microstructure and texture formation in extruded lead sulfide (galena)

A. MAULER, M. BYSTRICKY, K. KUNZE and S. MACKWELL — 1633 — Microstructures and lattice preferred orientations in experimentally deformed clinopyroxene aggregates

F. HEIDELBACH, A. POST and J. TULLIS — 1649 — Crystallographic preferred orientation in albite samples deformed experimentally by dislocation and solution precipitation creep

Z. JIANG, D. J. PRIOR and J. WHEELER — 1663 — Albite crystallographic preferred orientation and grain misorientation distribution in a low-grade mylonite: implications for granular flow

G. E. LLOYD 1675 Grain boundary contact effects during faulting of quartzite: an SEM/EBSD analysis

B. NEUMANN 1695 Texture development of recrystallised quartz polycrystals unravelled by orientation and misorientation characteristics

P. D. BONS and B. DEN BROK 1713 Crystallographic preferred orientation development by dissolution–precipitation creep

D. CHATEIGNER, C. HEDEGAARD and H.-R. WENK 1723 Mollusc shell microstructures and crystallographic textures

*Section 3: Correlation of Textures and Anisotropic Physical Properties*

B. LEISS and T. WEISS 1737 Fabric anisotropy and its influence on physical weathering of different types of Carrara marbles

H. SIEMES, H. SCHAEBEN, C. A. ROSIÈRE and H. QUADE 1747 Crystallographic and magnetic preferred orientation of hematite in banded iron ores

H. DE WALL, M. BESTMANN and K. ULLEMEYER 1761 Anisotropy of diamagnetic susceptibility in Thassos marble: A comparison between measured and modeled data

F. J. BROSCH, K. SCHACHNER, M. BLÜMEL, A. FASCHING and H. FRITZ 1773 Preliminary investigation results on fabrics and related physical properties of an anisotropic gneiss

*Section 4: Textures and Property Analyses as Indicators for Geological Processes*

M. BESTMANN, K. KUNZE and A. MATTHEWS 1789 Evolution of a calcite marble shear zone complex on Thassos Island, Greece: microstructural and textural fabrics and their kinematic significance

G. MOLLI, P. CONTI, G. GIORGETTI, M. MECCHERI and N. OESTERLING 1809 Microfabric study on the deformational and thermal history of the Alpi Apuane marbles (Carrara marbles), Italy

W. UNZOG and W. KURZ 1827 Progressive development of lattice preferred orientations (LPOs) of naturally deformed quartz within a transpressional collision zone (Panafrican Orogen in the Eastern Desert of Egypt)

J. K. BECKER, S. SIEGESMUND and H. A. JELSMA 1837 The Chinamora batholith, Zimbabwe: structure and emplacement-related magnetic rock fabric

A. STEENKEN, S. SIEGESMUND and T. HEINRICHS 1855 The emplacement of the Rieserferner Pluton (Eastern Alps, Tyrol): constraints from field observations, magnetic fabrics and microstructures
